Subject: Cost Scenario Analysis (draft) – Request for feedback

Hi Adam and Melani,

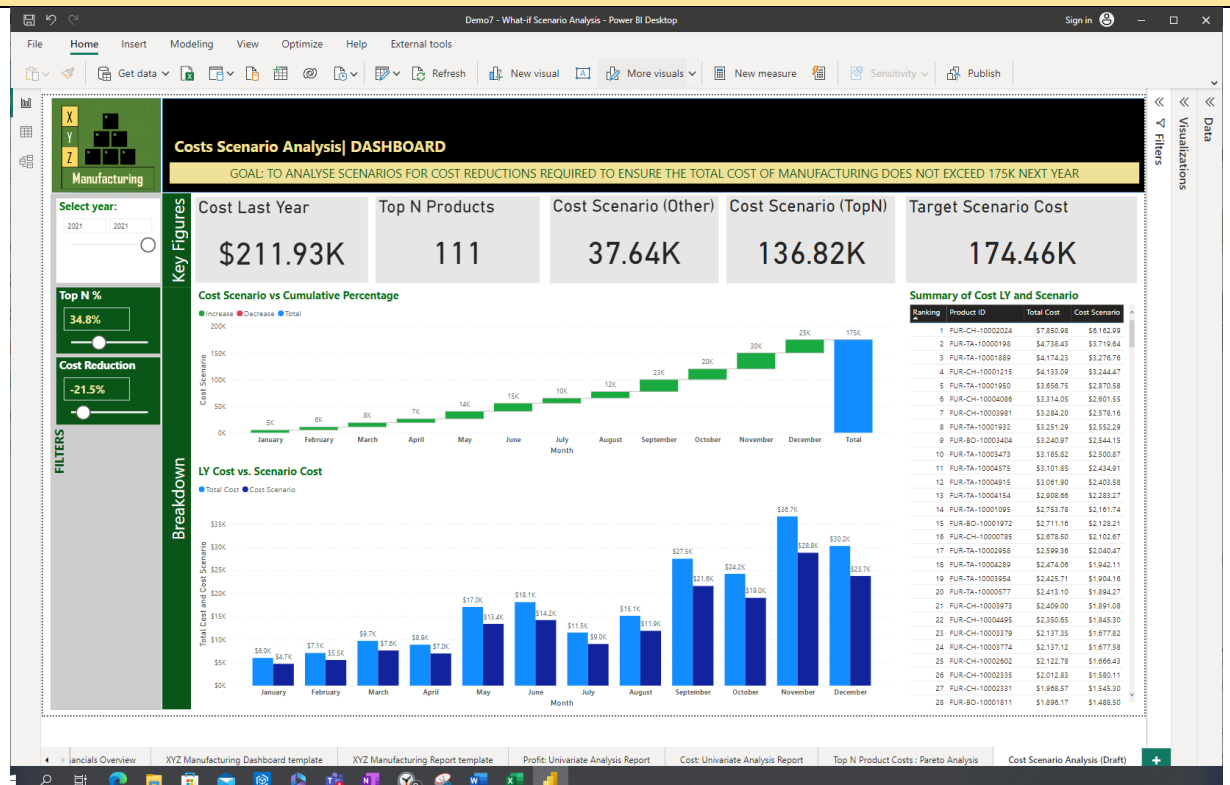

I'm glad to inform you that the draft version of the analysis report is ready for your review. I have included a screenshot of what the report page looks like and would appreciate if you can complete the draft report design feedback form with your input, feedback, comments and relevant suggestions that I can incorporate in the final version of the report.

The scenario analysis report, based on the 2021 data indicates that applying a cost reduction of 21.5%, to the Top N (34.8%) of products (total of 111 items), combined with the rest of the products (with no adjustments) results in a total manufacturing cost of \$174,460.

Cost Scenario Analysis (Draft)

Feedback, suggestions and comments.

<please include your feedback, comments and relevant suggestions here.>

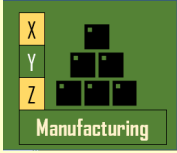

Looking forward to your feedback,

Thanks and kind regards,

Jenny O'Brien
